

ARE YOU A THINKER, OR DO YOU THINK YOU ARE A THINKER ?

Some folks think they are thinking, when in reality, they are just rearranging their prejudices. In light of that statement, I learned years ago that, generally speaking, (1) if you make people think they are thinking , they will love you; but (2) if you make people think a little, they will like you a little, but (3) if you really cause them to think, they will hate you. How sad, but oh so true. As one has so aptly put it, "There is no end to which some people will go to avoid the labor of thinking. Prejudice rules out honest, clear, objective evaluation and is still the lock on the door of a closed mind."
